Experience

Since January 2014, I have been working as a **software development intern** for **TripLingo** and am using **JavaScript** and **Appcelerator Titanium** to reimagine the **TripLingo** translation app for use in a medical translation context.

Since January 2014, I have been working alongside **Michael Tavani** and **Calvin Yu,** from Scoutmob, at a new startup to design an iPhone app called Anchor for keeping track of conversations with acquaintances and business connections.

Between October 2013 and January 2014, I worked alongside **Rushir Parikh** to found a **startup** centered around an **Android** news app that allowed users to give back to authors through microdonations. Our venture was mentored and advised by **Pascal Finette**, the past Chair of the Board of **Mozilla**, and **Charlie Harding**, a program manager at **Google.**

I worked as an **independent software developer** for **BestFit Mobile** between April 2013 and January 2014. While there, I gained experience with **JavaScript**, **Sencha Touch**, and **Apache Cordova**.

- I developed an app that allows doctors to refer patients to other doctors for **BestFit**, acting as the lead front-end developer on a contract with **Fresenius Medical Care,** a dialysis company with 55,000 employees.
- I wrote a conference room booking app for internal use at **BestFit** that utilizes **OAuth 2.0** and **Google Calendar**.

Skills

- JavaScript, Java, Python, Node.js, SQL, NoSQL, HTML, Jade, CSS, SH

Education

- Enrolled at the **Georgia Institute of Technology** for a Bachelor of Science (BS) in **Computer Science** in the fall of 2014
- SAT Score: 1550/1600 or 2270/2400
- Score of 5/5 on **AP Computer Science** exam

Bio

I am a high school senior living in Gainesville, GA. I am passionate about technology, startups, and open source. I drink excessive amounts of coffee, run cross country, and love music— mostly indie folk and electronic.
